

Smallest Number

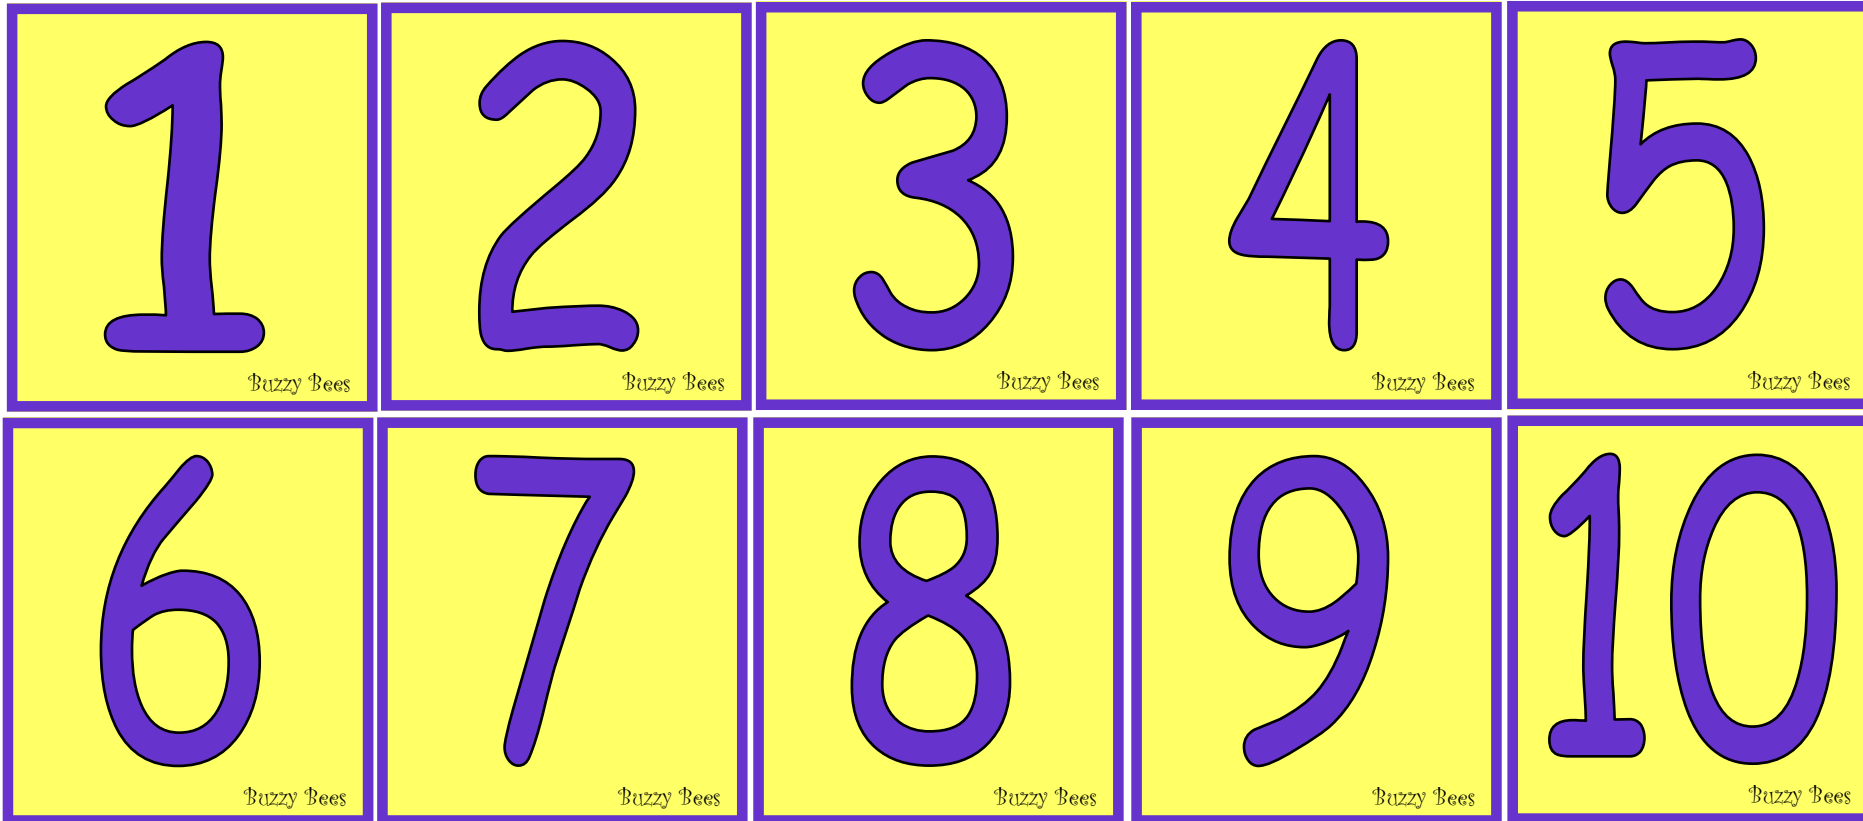

Largest Number

I am learning to say the number before or after a given number in the range 0-10

- ◆ Each player has a game board. Turn the numeral cards face down. Place the 'Bee Card' in the middle of the group, face up.
- ◆ Take turns to pick a numeral card.
- ◆ State the number that comes next (the number that is one more than the number on the card).
- ◆ If correct, place this card on your game board.
- ◆ Arrange cards from smallest to largest as you collect more cards.
- ◆ If you turn over a card you already have, miss a turn.
- ◆ The first one to get all five cards arranged in the correct order grabs the 'Bee Card' and wins the round. This person places a counter on their bee hive. Play the game again. The first person with three counters on their hive wins the game.
- ◆ Try playing again and saying the number that comes before (the number that is one less than the number on the card).

Print two sets of numeral cards for each game.
