

Smallest Number

I am learning to say the number before or after a given number in the range 0-20

- ◆ Each player has a game board. Turn the numeral cards face down. Place the 'Penguin Card' in the middle of the group, face up.
- ◆ Take turns to pick a card.
- ◆ State the number that comes next (the number that is one more than the number on the card).
- ◆ If correct, place this card on the game board.
- ◆ Arrange cards from smallest to largest as you collect more cards.
- ◆ If you turn over a card you already have, miss a turn.
- ◆ The first one to get all five cards arranged in the correct order grabs the 'Penguin Card' wins the round. This person places a counter on their igloo. Play the game again. The first person with three counters on their igloo wins the game.
- ◆ Try playing again and saying the number that comes before (the number that is one less than the number on the card).
